Market Linkco – Affiliate API Documentation

Complete guide to integrate with our lead management system

🔐 Authentication

All API requests require an `Api-Key` header with your unique affiliate API key.

```
Header: Api-Key: your_api_key_here
```

Contact your account manager to receive your API key.

🌐 Base URL

```
https://backend.marketlinkco.live/functions/v1
```

Endpoints

POST `/submit-lead`

Submit a new lead to the system

Parameters

Parameter	Type	Required	Description
`firstname`	string	Required	Lead's first name
`lastname`	string	Required	Lead's last name
`email`	string	Required	Lead's email address
`mobile`	string	Required	Lead's phone number
`country_code`	string	Required	2-letter ISO country code (e.g., US, GB, CA)
`country`	string	Optional	Full country name
`ip_address`	string	Required	Lead's IP address
`offer_name`	string	Optional	Offer/campaign name
`custom1`	string	Optional	Custom tracking parameter 1
`custom2`	string	Optional	Custom tracking parameter 2
`custom3`	string	Optional	Custom tracking parameter 3
`comment`	string	Optional	Additional notes
			Ad click tracking ID — unique ID generated when user clicks an affiliate

`click_id`	string	Optional	Ad click tracking ID — unique ID generated when user clicks an affiliate ad link. Pass this to trace the lead back to the exact ad click for attribution and reporting.
`locale`	string	Optional	Browser/language locale of the lead (e.g. en-US, fr-FR). Auto-derived from country_code if not provided.

Example Request

```
POST https://backend.marketlinkco.live/functions/v1/submit-lead
Headers:
  Api-Key: your_api_key_here
  Content-Type: application/json

Body:
{
  "firstname": "John",
  "lastname": "Doe",
  "email": "john.doe@example.com",
  "mobile": "+14165551234",
  "country_code": "CA",
  "country": "Canada",
  "offer_name": "Summer Promo",
  "custom1": "tracking123",
  "click_id": "abc123",
  "locale": "en-CA"
}
```

Success Response

```
{
  "success": true,
  "message": "Lead submitted successfully",
  "data": {
    "lead_id": "9783cddc-ea4a-4a36-b207-52360b6634fc",
    "request_id": "fa4b6d82-b789-4c29-b069-a3c6a8d0fa9d",
    "autologin_url": "https://broker.com/autologin?token=abc123"
  }
}
```

🔗 **Autologin URL:** When available, the `autologin_url` field contains a URL that allows the lead to be instantly logged into the advertiser's platform. Redirect the user to this URL immediately after submission for seamless onboarding.

Error Responses

```
// Validation Error (422)
{ "success": false, "message": "Validation failed", "errors": { "email": "Invalid email format" }
}

// Duplicate Email (409)
{ "success": false, "message": "DUPLICATE" }

// Caps Full (503)
{ "success": false, "message": "CAPS_FULL" }
```

GET /get-leads

Retrieve leads with status and FTD updates

Query Parameters

Parameter	Type	Required	Description
fromDate	string	Required	Start date (MM/DD/YY)
toDate	string	Required	End date (MM/DD/YY)
hasFTD	integer	Optional	Filter by FTD status (0 or 1)
status	string	Optional	Filter by sale status (returned from advertiser CRM)
email	string	Optional	Filter by email
lead_id	string	Optional	Filter by specific lead ID

Note: Date range filters by `updated_at` — returns only leads that had status/FTD changes in that period. Rejected leads are excluded by default.

Example Request

```
GET https://backend.marketlinkco.live/functions/v1/get-leads?fromDate=01/01/26&toDate=01/31/26&has
FTD=1
Headers:
  Api-Key: your_api_key_here
```

Response

```
{
  "success": true,
  "message": "Leads fetched successfully",
  "count": 2,
  "data": [
    {
      "id": "9783cddc-ea4a-4a36-b207-52360b6634fc",
      "lead_code": "fa4b6d82-b789-4c29-b069-a3c6a8d0fa9d",
      "firstname": "John",
      "lastname": "Doe",
      "email": "john.doe@example.com",
      "country_code": "CA",
      "mobile": "14165551234",
      "status": "Depositor",
      "is_ftd": 1,
      "ftd_date": "2026-01-15T10:30:00Z"
    }
  ]
}
```

Status Field: The `status` field contains the sale status as reported by the advertiser's CRM system (e.g., "New", "Callback", "Depositor", "No Answer"). Values vary by advertiser.

GET `/lead-status`

Check status of a specific lead

Query Parameters (one required)

Parameter	Type	Description
`lead_id`	string	The lead UUID
`request_id`	string	The request ID returned from submission
`email`	string	The lead's email address

Example Request

```
GET https://backend.marketlinkco.live/functions/v1/lead-status?request_id=fa4b6d82-b789-4c29-b069-a3c6a8d0fa9d
Headers:
  Api-Key: your_api_key_here
```

Response

```
{
  "success": true,
  "lead_id": "9783cddc-ea4a-4a36-b207-52360b6634fc",
  "request_id": "fa4b6d82-b789-4c29-b069-a3c6a8d0fa9d",
  "status": "Callback",
  "is_ftd": 0
}
```

ℹ️ **Status Field:** The `status` field contains the sale status as reported by the advertiser's CRM system.

📊 Status Values

The `status` field contains the sale status as reported by the advertiser's CRM. Common examples:

New	Lead received
Callback	Scheduled callback
No Answer	No response
Depositor	Made deposit
Interested	Shows interest
Not Interested	Declined

Exact values depend on the advertiser's CRM configuration and may differ from the examples above.

⚠ HTTP Status Codes

Code	Description
200	Success
201	Lead created successfully
400	Bad request – missing required parameters
401	Unauthorized – invalid or missing API key
404	Lead not found
409	Duplicate – email already exists
422	Validation error
503	Caps full – try again later
